

LAB SHEET – 1

DART PROGRAMMING BASICS

AIM: To understand the fundamental concepts of Dart programming and implement basic Dart programs.

PROGRAMS:

1. Write a Dart program to display your name, course, college name, and semester.
2. Write a Dart program to declare variables of different data types (int, double, String, and bool) and display their values.
3. Write a Dart program to demonstrate the use of var, final, and const.
4. Write a Dart program to accept two numbers and display their sum, difference, product, and quotient.
5. Write a Dart program to calculate the area and perimeter of a rectangle.
6. Write a Dart program to calculate the area of a circle.
7. Write a Dart program to convert temperature from Celsius to Fahrenheit.
8. Write a Dart program to swap the values of two variables.
9. Write a Dart program to check whether a given number is positive, negative, or zero.
10. Write a Dart program to check whether a given number is even or odd.
11. Write a Dart program to find the largest of two numbers.
12. Write a Dart program to find the largest of three numbers.
13. Write a Dart program to check whether a given year is a leap year.
14. Write a Dart program to calculate grades based on the percentage obtained by a student.
15. Write a Dart program to print numbers from 1 to 10 using a for loop.
16. Write a Dart program to print all even numbers between 1 and 50.
17. Write a Dart program to calculate the sum of the first 10 natural numbers.
18. Write a Dart program to generate the multiplication table of a given number.
19. Write a Dart program to calculate the factorial of a given number.

20. Write a Dart program to reverse a given number using a loop.
21. Write a Dart function that accepts two numbers and returns their sum.
22. Write a Dart function to check whether a given number is prime or not.
23. Create a list of five student names and display each name using a loop.
24. Create a list of numbers and find the largest and smallest number from the list.
25. Develop a Student Result Program in Dart that stores the student's name and marks in three subjects, calculates total marks and percentage, and displays the result as Pass or Fail.
